Abstract of JP8039126

PURPOSE: To form laminar flows of a uniform thickness and water volume density over a long distance. CONSTITUTION: Plural slit laminar flow coolers 11 are arranged in series apart specified intervals. Sub-slit laminar flow coolers 12 of a small capacity which supply separate laminar flows to the connecting parts not struck with the laminar flows from the respective slit laminar flow coolers 11 are arranged within the headers 11b of the respective slit laminar flow coolers 11.
